

NOTES TO AUTHORS

Papers submitted must contain original unpublished work and should not be under consideration for publication elsewhere. They must be written in standard grammatical English; this is the responsibility of the authors. Paper should be sent to the Editorial Office. Each paper submitted is subject to a review procedure, and the publication decision is based on reviewers' comments. Please follow the Journal Style conventions as described in the Notes to Authors.

Papers should be submitted *electronically*, in MS Word or LATEX format. In addition, a PDF file of the paper is necessary. Papers should be written (Times New Roman, 11 pt) on A4 paper format (297×210 mm) with margins (top, bottom 55,5 mm; left, right 39,5 mm), single spacing, in one column, and should not exceed 12 pages. An abstract, not exceeding 120 words, and key words, clarifying the subject of the manuscript, should be included at the beginning. Bulgarian authors are requested to present a Bulgarian version of their titles and abstracts.

The Journal does not have article processing charges (APCs) nor article submission charges. The review process is Blind Peer Review.

The title page of the paper should contain: (i) the title of the paper. (ii) the names and complete mailing addresses, including e-mail, of all the authors with the corresponding author being clearly identified, and (iii) an abstract and key words. Formulae and symbols must be written legibly and clearly. Such characters e.g. 0 (numeral) and O (letter), 1 (numeral) and l (letter) that are easily confused should be distinguished clearly. The numbering of the formulae must be done in Arabic numerals, in small brackets, and on the left-hand side of the corresponding formula. Figures and tables should be numbered consecutively. Line drawings should be supplied as clear sharp prints, suitable for direct reproduction and not exceed sizes (sub-figure (a), (b) etc. width 60 mm, height 70 mm). Diagrams must be drawn in black ink on a white background. Lettering should be in proportion to the overall dimensions of the diagrams. Lines and symbols must be drawn clearly enough to allow reduction, as well major and minor ticks must be drawn inside diagrams. Shaded areas should be indicated by hatching or cross-hatching as fine dots are not picked up in reproduction. Writing formulae or explanations on the diagram itself should be avoided. Authors should refer to the line drawings as Fig. 1, Fig. 2 etc., and any sub-sections as (a), (b) etc. and insertion points indicated within the text. Figure legends, clearly identified, should be written on a separate page. Figures may be sent as files in CDR, PCX, BMP, WMF, EPS, TIFF, GIF or PS graphic formats, a minimum resolution of 300 dpi (grayscale) is required.

References should be given at the end of the paper and should be numbered between square brackets in the order of appearance in the text, each reference giving author(s) (names and initials of the first names), complete title of the article, name of the journal or book (please use the common abbreviations), volume, year of publication between brackets, first and last page numbers of the article. In the text, each reference should be numbered between square brackets as well (in increasing order). Examples:

[1] ARGIRIS, J. H., J. ST. DOLTINIS. On the Natural Formulation and Analysis of Large Deformation Coupled Thermomechanical Problems. *Comp. Math. Appl. Mech. Eng.*, **25** (1981), No. **3**, 195-253.

[2] HAUSSMANN, W., L. ROGGE. In: General Inequalities, **5** (Ed. W. Walter), Basel – Boston – Stuttgart, Birkhausen, 1987.

Copyright. Upon acceptance of a paper, authors will be asked to complete a "Copyright Transfer Agreement".
